50X1-HUM

1. In October and November 1953 a total of 1,700 metric tons of sulphuric acid (H_2SO_4) was to be imported by DIA for the use of the Technisches Kontor, Karl-Marx-Stadt (Wismut AG).

2. Wismut AG has refused to accept this quantity of sulphuric acid. It is rumored that this is due either to a change in its production program or to a change in its production processes.

3. Sulphuric acid imports from Rumania were therefore cut down to 400 or 500 metric tons, and all surplus quantities of the acid were transferred to VEB Schwefelsaeure & Superphosphat Werk, Coswig, Anhalt, which uses it in the production of fertilizers.
